### HOW TO REQUEST A HYDRANT FLOW TEST

To request a hydrant flow test, please carefully follow these steps:

#### **STEP 1**

1. First verify that you need a fire flow test and that you are applying through the correct agency.
  - **City of Elk Grove** - Sacramento County Zone 40 projects:
    1. Commercial: May only need a fire flow test for large projects that require more than 3,000gpm at 20psi fire flow. Fire sprinkler systems shall be designed to 50psi static, 20psi residual, and 3,000gpm.
    2. Residential Subdivision: Likely does not need a fire flow test except individual homes exceeding 13,400 square feet on public water. Residential fire sprinkler systems on public water shall be designed to 50psi static, 20psi residual, and 1,500gpm.
  - **City of Elk Grove** – Elk Grove Water District projects please contact Elk Grove Water District directly. Do not apply through the portal.
  - **City of Galt** – City of Galt Water District for commercial and residential projects please apply through Cosumnes Fire Department Portal.
  - **Wilton Fire Protection District** – Does not require a fire flow test due to no public water.

#### **STEP 2**

2. To apply: On the Plan Review and Inspections homepage, locate the red button to open the **Permit Portal:** <https://www.cosumnescsd.gov/303/Plan-Review-and-Inspections>
